(2019 Schedule Continued)

- 2:00 pm: African Americans in Appalachia Seminar – Library – Ann Woodford African Americans first arrived in Appalachia in the mid 1500s as slaves to Spanish and French explorers; centuries later many would return to the area as slaves once again. However, with their return, African Americans would play an influential role in Appalachian culture and society, contributing to regional music, oral history and folk art. As outsiders became more and more intrigued with Appalachia and associations of homogeneity were developed, minorities such as African Americans and their existence in the region were sorely overlooked. Yet, as Appalachian Studies have emerged and scholarship on the region has progressed, more attention has been paid to African Americans or, “Affrilachians,” as they are often referred to, and the roles they have played in Appalachian culture.
